

Brightly TheWorxHub™ for Senior Living

How does it work?

TheWorxHub is a cloud-based, all-in-one solution that allows senior living operations managers to simplify their daily work, reduce and control costs, become proactively compliant and deliver exceptional resident experience. Unlike other senior living operations management solutions, TheWorxHub is an interconnected system that efficiently manages everything that an operations team encounters, including work orders, preventive maintenance, compliance tasks, quality inspections and housekeeping.

Simplify your daily work

with anytime, anywhere access to the information and tools your team needs to work at their computer or in the field. Seamlessly connect work, assets, departments and projects within one system to streamline communication and drive decision-making with data.

Reduce and control costs

by effectively creating long-term capital plans, use factual data to make repair versus replacement decision and increase billing for extra work completed.

Deliver exceptional residence experience

by using software to document resident preferences, improve response times and communication, streamline transportation and create hassle-free room bookings.

Become proactively compliant

with simple tools for risk assessments, preventive maintenance workflows and compliance code tracking, so you can prevent problems (or fines) before they occur.

Technicians can access the information they want a lot faster than they have ever been able to in the past. It has made my existing staff more efficient.

Casey Jones
Presbyterian Senior Living
