

# Simplified Migration to Asset Essentials

## Change your organization can embrace

Migrating to a new operations platform can seem challenging. You need answers to an endless number of questions, a complete change management strategy and full organizational buy-in to be successful. But what if the transition was simple? The right tools to automate moving your data and training every level of your organization can ease the stress tied to platform migration. Migrating to the future-proof and feature-rich Asset Essentials platform has never been easier.

### The right tools for migration success

Among the biggest challenges to platform migration are data movement and training your entire staff on the new platform. Is your data going to be ready and complete? Is your staff going to resist the change due to learning roadblocks? With automated data movement, in-product training tools and a seamless, self-guided migration path, successful migration is faster and more efficient than ever. You will get access to your Migration Hub, which is your key resource that outlines every step of your transition journey with everything you need for a successful migration.

Complete in-product training for the entire organization One of the largest setbacks that comes with moving to a new platform is training your staff. From technician to Administrator, your team will need the tools to become effective as quickly as possible. Asset Essentials comes with built-in, guided training that ensures every level of your organization can get up to speed quickly. These role-based, in-product guides include operations tasks such as:

Setup and configuration for administrators

Preventative maintenance schedules

Work orders

Platform navigation

User management

Asset management

These in-app guides are the fastest way to train any user including admins, technicians, site admins and supervisors. Coupled with our vast training library of tutorials, videos and documents, you can rest easily knowing you're equipped with everything you need for a smooth transition.

### Get your data when you need it

Leveraging the best in data movement technology, migrating your data from your old system to Asset Essentials has never been more seamless. Get 100% of your current data migrated to your new system in minutes instead of weeks. With your initial data sync, we stage a training environment with your locations, assets, configurations, users and more so you can learn the new platform with familiar data. Once you and your team are ready to start using the new platform, your data is synced one last time to ensure the most current work orders and updates are there when you need them.

### Get your data when you need it

Changes in the technology landscape and market needs often translate to the need for innovative technology to power your operations. With Asset Essentials, not only do you get the latest in features and integrations, but you will also benefit from these efficiency builders:

- Get reactive, proactive and mobile maintenance in one platform.
- Streamline workflows with more advanced routing and customization.
- A modern look and feel that simplifies training and everyday use.
- Continuous development to meet your needs now and in the future.
