

Strategic Asset Management Framework

Strategic asset management builds on the infrastructure planning you are already doing. It provides a clear picture of future asset conditions and corresponding service levels, enabling your organization to make optimal investments today.

Strategic Asset Management

▶▶▶▶▶▶ The Optimization Layer

Optimize & Plan

- Leverage asset lifecycle modeling and trade-off analysis to balance budget, works and service requirements for the best asset outcomes
- Improve plans and align goals across the organization
- Create visual data stories for stakeholders

Improve Operations

- Streamline work orders, time and attendance
- Inspect and analyze conditions
- Maximize uptime and manage risk
- Report on performance

Know Your Inventory

Answer the questions:

- What assets do I own?
- Where are they located?
- What condition are they in?
