Confirm for Public Infrastructure

Innovation through technology integration, empowering your workforce to be agile and sustainable.

Today, communities and residents are ever more reliant on public infrastructure in our towns and cities. Greater demands generate higher expectations, but meeting these expectations against what can be financially delivered is difficult. Many government organisations have short-term, uncertain budgets and disparate asset systems with a lack of integration. These issues lead to an inability to meet resident expectations.

Designed specifically for public infrastructure, Brightly Confirm is a leading all-in-one cloud-based enterprise asset management solution. It is flexible, innovative, and provides a central hub for assets while being complimentary to your technology integrations. Confirm streamlines information related to your assets, providing the real-time insight you need, whether you are in the office or out in the field.

Create structure and collaboration through digitalisation

Easily centralise and view all assets, allowing collaboration across asset teams to identify and effectively address priorities and risks across all asset types with access to key historical data for decision-making.

Greater operational efficiency and sustainability

Streamline day-to-day operations by monitoring, assessing, and controlling assets with preventive maintenance. Realise demand and needs across different asset types to be more sustainable and effective in deploying your resources.

Maximise your assets without compromising budgets

Track performance, risk, and expenditures through smart real-time data to make actionable decisions. Leverage algorithms to quickly view multiple funding scenarios and maximise the longevity of assets based on your asset strategy.

> **What we've been able to achieve using Confirm is to understand our assets, where they are and what state of repair they're in. Then we can apply this new technology and understanding of what's around us to provide better services to our citizens.**

Aberdeenshire Council

brightlysoftware.com/theworxhub

Built for speed of operations, agility, and simplicity, Confirm allows you to add value across your entire organisation with one integrated solution. Allow your field workers to schedule, manage, and maintain all asset-based work orders in the office and on the move via mobile.
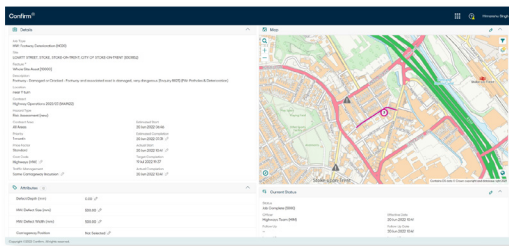

A single source of truth

Be gone with the days of data input into numerous systems to manage, maintain, and report on assets. Confirm eliminates the need for multiple system inputs but maximises efficiency with one system, one vendor, and all your public infrastructure assets in one location, making it easy to keep those assets performing at the highest level.
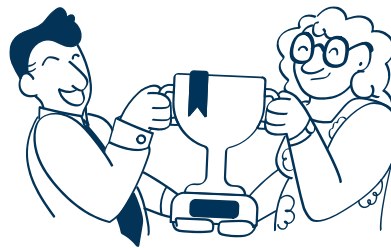

A proven track record

Brightly Confirms software solution has been the number one choice for many public sector organisations for over 30 years, positioning Brightly as the vendor of choice with its cutting-edge solutions and future innovation.
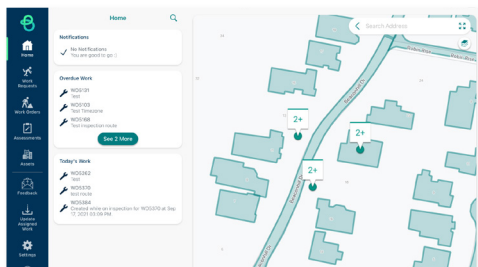

Making the complex easy

Easily maintain and manage all assets, understanding conditions, costs, and compliance, making it simple to go from job enquiry to job completion all through one system, even on the move.
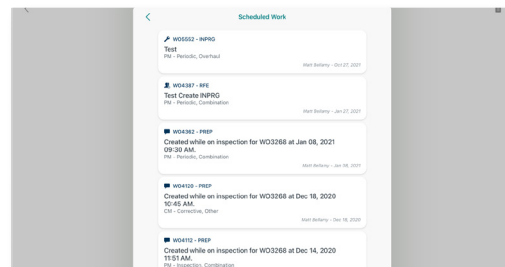

Easy reporting

Pre-defined dashboards and reporting tools give you a full view of asset performance and sustainability goals, enabling your maintenance and operations to measure up to KPIs to report to all stakeholder levels.

About Brightly Software

Brightly, a Siemens company, enables organisations to transform the performance of their assets. Brightly is the global leader in intelligent asset management solutions. Brightly's sophisticated cloud-based platform leverages more than 20 years of data to deliver predictive insights that help users through the key phases of the entire asset lifecycle. More than 12,000 customers of every size worldwide depend on Brightly's complete suite of intuitive software—including CMMS, EAM, Strategic Asset Management, IoT Remote Monitoring, Sustainability and Community Engagement. Paired with award-winning training, support and consulting services, Brightly helps light the way to a bright future with smarter assets and sustainable communities.
