

GRESB Reporting

GRESB is a globally recognized benchmark for assessing the ESG performance of real estate organizations, funds, and assets. By participating in GRESB, companies can gain important insights on how their sustainability practices and performance stack up against peer organizations and best practices.

The Value of Reporting to GRESB

- Enhance sustainability performance by pursuing GRESB's best practices.
- Improve investor confidence by demonstrating a commitment to sustainability.
- Know where you stand compared to industry peers and sustainability leaders.
- Celebrate your hard work in driving sustainability within your organization.

Key Benefits of Working with Brightly

The Stream GRESB Module

- Manage your submission through Brightly's GRESB module to improve your visibility, control, and confidence over asset-level reporting.
- Save time by leveraging existing utility data, submeter data, building information, and documentation collected in Stream.
- Brightly is a GRESB Data Partner. The Stream GRESB module connects directly to the GRESB portal via the GRESB API so you can easily sync your asset-level performance data.
- Leverage the expertise of Brightly's systems and people. The GRESB module is built to incorporate the knowledge our team has developed over a decade of supporting GRESB submissions.

Data Coverage Expansion

- Gain insights from Brightly's GRESB services team on new avenues you can pursue for energy, water, and waste data collection.
- Streamline data collection through additional Stream offerings and mobile applications.
- Work directly with Brightly GRESB SMEs to develop a tailored strategy for your needs and execute key opportunities.

Expert Support

- Work with a highly knowledgeable team of experts dedicated to ensuring data accuracy and reliability.
- Brightly has extensive experience in working with utility vendors, property managers, sustainability teams, building operations, and asset owners. Our team's industry knowledge can help you better achieve your sustainability goals.
- Benefit from our focus on data accuracy and reliability, ensuring that all emissions data is meticulously gathered, analyzed, and reported.

About Brightly Software

Brightly Software, a Siemens company, enables organizations to manage the entire lifecycle of their assets, facilities and infrastructure. As the global leader in intelligent asset management solutions for more than 25 years, Brightly's sophisticated cloud-based platform is expertly designed to improve capital planning through smarter, data-driven decision making, empower technicians to predict, prioritize and manage preventative maintenance activities, and support organizations to achieve sustainability, compliance and efficiency goals. Combined with award-winning training, legendary support and managed services, more than 12,000 clients worldwide depend on Brightly to optimize their teams, operations and strategic planning initiatives.
