

A smarter way to manage district-owned vehicles

While school districts effectively manage daily bus fleets, there is often a critical data gap when it comes to vehicles used for athletics, field trips, and specific events.

These vehicles, including vans, minibuses, and district-owned SUVs, are often:

- Tracked manually, or not at all;
- Managed separately across departments without a centralized system for tracking
- Prone to overbooking, missed communication, or underutilized.

Transportation Manager for Brightly's Event Manager is a digital request and tracking system that combines all district vehicle operations into a single, centralized registry. This module helps reduce vehicle downtime, avoid double-bookings and unnecessary rentals, and improve cost recovery, freeing up staff to focus on students - not transportation logistics.

Key Benefits

Digitize scheduling so staff moves away from emails and spreadsheets

Streamline data access with at-a-glance vehicle statuses, availability, and requests

Track vehicle usage with full visibility into mileage, trip purpose and history

Improve vehicle access across all departments

Improve productivity as staff is freed up for other key responsibilities

Improve cost recovery with automated usage-based invoicing

Product Features

- Locate any trip through a quick search for any trip, or filter by status, trip type, vehicle, or driver
- Enable drivers to view upcoming assigned trips, or quickly submit new trip requests
- Improve coordination with in-app comments, request approvals and declines
- Enhanced communication includes real-time email alerts for new requests, and vehicle/driver information for approval notifications

How are schools using it?

- **Athletics:** Reserve buses for away games
- **Maintenance:** Assign trucks for event set-up
- **Food services:** Schedule catering vans for special events
- **Administration:** Track use for off-site meetings

About Brightly Software

Brightly Software, a Siemens company, enables organizations to manage the entire lifecycle of their assets, facilities and infrastructure. As the global leader in intelligent asset management solutions for more than 25 years, Brightly's sophisticated cloud-based platform is expertly designed to improve capital planning through smarter, data-driven decision making, empower technicians to predict, prioritize and manage preventative maintenance activities, and support organizations to achieve sustainability, compliance and efficiency goals. Combined with award-winning training, legendary support and managed services, more than 12,000 clients worldwide depend on Brightly to optimize their teams, operations and strategic planning initiatives.
